

**T**he Geary Family YMCA building stands at the heart of the City of Fostoria. As it has since 1912, it provides a place for people of all ages to socialize, and offers a place for a wide range of activities run by and for the community.

**YMCA Mission:** To put Christian principles into practice through programs that build healthy spirit, mind, and body for all.

The facade stone panels and brick masonry are in need of repair as well as some renovation to interior spaces. The building is aging and is in need of repairs. Without significant upgrades and renovations, it will continue to decline.

**As a part of the Y's family,** you are already a part of its legacy. To ensure the future of the Geary Family YMCA, your donation is critical. We need to make sure our stewardship continues to keep the building in good shape and that our programs continue to improve, both for today and for tomorrow.

With your leadership, and that of others who hold the institution dear, the YMCA can continue to stand in the heart of the community and to build values-based leadership for decades to come.

## 2008 Capital Campaign

We build strong **KIDS**  
strong **FAMILIES**  
strong **COMMUNITIES**

### *Community Impact*

Last year, over 2,060 people participated in YMCA programs. Over 600 local families met eligibility requirement for assistance.

### *Positive Programs*

YMCA programs focus on producing the outcomes we all want for our children, our grandchildren, and our community.

The four character values that the YMCA strives for are: caring, respect, honesty and responsibility.

### *Diversity*

The YMCA is for everyone. There are programs to meet all needs and interests.

### *Solid History of Service*

Effective community-based organization since 1912. For many, the YMCA is the heart of the Fostoria community.

## Building Facade Repairs

Exposed steel connections for limestone panels. Note that the connections are severely corroded, many of the connections have lost significant cross section area. Also note that the anchored portion of the connection has pulled out of the limestone or the steel angle in some locations.
